Allowable Subject Matter

This application is in condition for allowance except for the presence of **Claim 21** directed to an invention non-elected without traverse. Accordingly, **Claim 21 has been cancelled.**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Kuehn on March, 8, 2010.

The application has been amended as follows:

Claim 26 (Currently Amended): A method of forming a semiconductor device, the method comprising: providing a single crystal silicon or polycrystalline silicon substrate; forming a SiGe surface layer having an average Ge content less than about 10 at.% on the silicon substrate, wherein the SiGe surface layer has an unreacted portion in contact with the silicon substrate and a surface portion; depositing an oxygen-containing high-k dielectric layer onto the surface portion of the SiGe surface layer;

forming an oxide layer between the oxygen-containing high-k dielectric layer and the unreacted portion of the SiGe surface layer by oxidizing the surface portion of the SiGe surface layer by diffusing oxygen from the oxygen-containing high-k dielectric layer into the surface portion ~~and/or~~ or by exposing the surface portion to an oxidizing

gas under oxidizing conditions or by both the diffusing and the exposing, the oxide layer being formed during one or both of said depositing and an annealing process after said depositing, and wherein oxidizing the surface portion of the SiGe surface layer substantially prevents oxidation of the silicon substrate during the depositing ~~and/or~~ or the annealing process or during both the depositing and annealing; and forming an electrode layer on the high-k dielectric layer.

Claims 1-8, 10-11, 13-20 and 26-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Re claim 1: the prior art fails to anticipate or render obvious the claim limitations including "forming a SiGe surface layer having an average Ge content less than about 10 at.% on the Si substrate" in combination with "wherein oxidizing the surface portion of the SiGe surface layer substantially prevents oxidation of the Si substrate during the depositing of the high-k dielectric layer or the annealing process."

Re claim 20: the prior art fails to anticipate or render obvious the claim limitations including "forming a SiGe surface layer having an average Ge content less than about 10 at.% on the Si substrate" in combination with "wherein oxidizing the surface portion of the SiGe surface layer substantially prevents oxidation of the Si substrate during the depositing or the annealing process."

Re claim 26: the prior art fails to anticipate or render obvious the claim limitations including "forming a SiGe surface layer having an average Ge content less than about 10 at.% on the Si substrate" in combination with "wherein oxidizing the surface portion

of the SiGe surface layer substantially prevents oxidation of the silicon substrate during the depositing or the annealing process or during both the depositing and annealing."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Colleen A. Matthews whose telephone number is (571)272-1667. The examiner can normally be reached on Monday - Friday 8AM-4:30PM.
